Re: Prairie Horizon Data Campus - Large Load Interconnection / Transmission Service Review Package
Project Reference: PHDC-LL-2026-017

Prairie Horizon Digital Infrastructure LLC submits the enclosed interconnection review package for Prairie Horizon Data Campus to support transmission-provider and transmission-owner review of a new large load to be served from a new customer breaker-and-a-half bay at Jefferson 138 kV Station. The package is intended for engineering review and provides a coordinated description of the ultimate 180 MW campus build-out, including phased load additions, site utilization, one-line topology, protection and metering concepts, and major equipment selections.

The project is proposed in Fayette County, Ohio, with a requested initial energization date of 2028-06-15 and ultimate campus loading of 180 MW by 2029-03-31. The customer service voltage at the point of interconnection is 138 kV; the campus medium-voltage distribution system is 13.8 kV.

The enclosed package includes: (1) large-load request form and contact sheet, (2) project summary and phased load schedule, (3) site control and parcel exhibit, (4) civil / electrical site plan, (5) single-line diagram, (6) protection / controls / communications package, (7) metering / SCADA / telemetry package, (8) equipment schedule with technical particulars, (9) facilities-study-style engineering memorandum, (10) construction phasing and energization plan, and (11) manufacturer reference attachments for the standby generation, UPS, and medium-voltage switchgear platforms referenced in the planning basis.

Please direct engineering and planning questions to the undersigned and to the engineer of record listed on the contact sheet. Updated relay settings, detailed AC/DC schematics, final short-circuit and harmonic studies, and sealed construction drawings will be submitted during detailed design after preliminary interconnection scope alignment.

Submitted by,

Marisol Reyes
Vice President, Development
Prairie Horizon Digital Infrastructure LLC

Attachment Checklist

Attachment	Description	Status
A	Large Load Request Form / Contact Sheet	Included
B	Project Summary and Phased Load Schedule	Included
C	Site Control and Parcel Exhibit	Included
D	Civil / Electrical Site Plan	Included
E	Electrical Single-Line Diagram	Included
F	Protection, Controls, and Communications Package	Included
G	Metering / SCADA / Telemetry Requirements	Included
H	Major Equipment Schedule and Technical Particulars	Included
I	Facilities Study Memorandum	Included
J	Construction Phasing and Energization Plan	Included
K	Manufacturer Reference Attachments	Included
