- GENERAL NOTES**
- Exhibit documents parcel control, approximate utility-interface area, and the conceptual placement of major campus facilities for screening-level interconnection review.
 - Parcel boundaries and acreages are diagrammatic but coordinated to a single project basis. Final legal descriptions and survey bearings would be issued separately.
 - Building footprints, emergency plant compounds, and the customer substation arrangement are shown for planning only and are not intended for construction.
 - No merchant generation, routine export, or market participation is proposed across the point of interconnection.
